

Free MOOC: **Anatomy and Physiology**

Earn 12 CEUs from AHIMA

Sponsored by The Department of Health Informatics & Information Management at The College of St. Scholastica

In October, the United States will transition from the International Classification of Diseases version 9 to version 10. This is a massive undertaking and it will have an effect on nearly every health care provider in the country, particularly if they are reimbursed by any payer (private or public).

AHIMA members are required to receive continuing education on ICD-10 to maintain their credential. One course that qualifies towards continuing education is Anatomy and Physiology.

The College of St. Scholastica is offering a Massive Open Online Course (MOOC) to the public at no cost. The course, Introduction to Anatomy and Physiology will be co-taught by Dr. Gerald Cizadlo and Dr. Kelly Eder.

Register by July 27, 2015. The course begins June 29 and needs to be completed by August 23, 2015.

This program is pending renewal for 12 continuing education unit(s) for use in fulfilling the continuing education requirements of the American Health Information Management Association (AHIMA).

Register by July 29
